The LAKETON NURSERIES

G. N. MOYER & SON, Prop.

Evergreens A Specialty

Your home may be made a center at a very small cost.
A few dollars and a little loving care will transform
any residence into one of ideal beauty.

Hardy Northern Grown
Fruit and Ornamental Trees, Small Fruits,
Ornamental Shrubs and Vines

LAKETON, INDIANA

Sedum, for price see page 33.

RETAIL PRICE LIST

The following listed stock is all first class of the grade named. In case of your ordering any item in a grade we are sold on, we reserve the right to give you the next higher or lower grade. In case we are entirely sold on any item you may order, we would be glad to select some other variety of equal merit, color and season. Our judgment of what is best is at your command.

Let us book your order and we will hold until you come for it, or until time to ship.

Orders desired shipped, will be packed F. O. B.—except evergreens, which must be boxed, and will be boxed at a reasonable cost.

Where it is possible, it will pay you to drive to the nursery. You can drive 40 or 50 miles, get your trees, get back home and plant all or part of it the same day.

We have a commodious packing house, where stock is heeled in and properly cared for, and especially for spring is this an advantage, as we can hold stock back, so that stock may be safely handled and planted later in the season.

Anticipating the needs and the demands along this line we have an unusually large and complete line of hardy Shrubbery, Roses, Hedge Plants, Climbing Plants, Shade Trees, a full line of Fruit Trees, Hardy Perennial plants for the "Flower Garden," bulbs, etc.

Last but not least we have a fine large supply in all the standard varieties in Evergreens. You should see them to appreciate them.

We have been in the business for fifty-one years. Our customers are our best advertisers. We solicit your business.

NOTE—If in need of stock in larger quantities than are named in list, write for prices and will make you special quotations.

NOTE—We will allow 5 at 10 rate and 50 at 100 rate.

NOTE—In growing large quantities of stock there is sometimes stock in off grades, either smaller or larger than herein quoted.

If interested in such grades, ask for prices.

TERMS—Cash, or if sent by express, C. O. D. on delivery.

OUR GUARANTEE

All goods are guaranteed to reach you in good condition; mistakes, if made, will be promptly rectified. Accept shipment, examine and count on receipt and notify us at once should there be any errors, and the carrier as well, if any damaged stock. This guarantee not good unless above requirements are complied with. We do not guarantee continued growth. Remember, a tree, shrub or plant is a living organism, as much as a cow, horse or man. It breathes, drinks and feeds, and is liable to attacks.

SHIPMENT—We commence to ship about March 10, weather being favorable and shipping season lasts until May 25th. We ship order any week you designate in your letter, weather being favorable. We have every means at hand to have your stock reach you in the best condition.

CLAIMS—All claims for shortage must be made inside of ten days after goods are received. If stock is not satisfactory complaint must be made at once. No attention will be paid to claims received months after the goods have been received.

HOW TO ORDER—Use order sheet in catalog or any ordinary writing paper. Be sure to sign your full name and address, writing plainly as possible. If Express or Freight orders are to be sent to some other place than your Post Office be sure to give directions in space provided on order sheet.

Stock listed as "Postpaid" in this catalog will be sent by prepaid parcel post. Other stock is sent by Express or Freight, not prepaid by us; this stock is, as a rule, too heavy for Parcel Post but we have reduced our prices on Express and Freight items so that the customer, after paying express or freight charges on a shipment get the benefit of the saving and this more than pays charges in most cases.

HOW TO SEND MONEY—Remittances may be made by postal or express Money Order, Draft, or Check. If cash is sent use registered letter. Postage stamps accepted only in payment of orders less than one dollar (1c and 2c stamps preferred).

CLUB ORDERS—It is best to order all your wants at one time. This will save you time in handling and planting. If your wants are few, have one or more of your friends or neighbors join with you in ordering. We will tie and tag each person's order separately and bundle all together in one package and ship to whatever address you desire.

FOR PLANTS ORDERED BY PARCEL POST—On Strawberry, add 12c per 100; Raspberry, add 15c per 25; Perennial and Rock Plants, add 10c per 12.

This Is Important Information

The man who contemplates the building of a home, first decides on a plan, and to secure the plan, he seeks the help of a competent architect.

Next—he builds his house and properly grades and levels the lawn.

THEN—

“It’s not a Home ’till It’s Planted”

Knowing that a great many planters are at a loss to know “What to plant and where to plant it,” we offer our services to all who may desire it. If interested, call or write us and a representative will call and see you, go over the matter with you, take measurements, and draw you a sketch plan.

The plan will then be brought to you for your inspection. Remember that our services are FREE, and our making you a plan in no way obligates you to accept it.

If our plan is satisfactory, we have two propositions to offer you.

FIRST—That we will sell you the stock and you do your own planting.

OR, we will deliver, plant and guarantee the stock for one year. Any that die, will be replaced free of charge.

TIME—An Important Element

April and May in Spring and October in Fall are very busy months with us, and the earlier you call us the more time we can give to “making plans”.

Telephone Service—Call North Manchester 722—Green.

THIS IS A CORDIAL INVITATION TO VISIT OUR NURSERY

Plan a trip to our nursery. You will see much to interest you and perhaps you will find a suggestion as to just the very things you need to make your grounds more beautiful and fruitful.

Look around and see the fine, healthy, hardy fruit and ornamental trees, the beautiful shrubs, vines, flowers and other growing things. You'll enjoy every minute of your visit.

WHY NOT BUY MORE FRUIT TREES?

How many dollars a year do you spend for fruit—either fresh or in cans?

Did you ever stop to think that one-tenth that sum invested in a few trees, would give you many times the amount of fruit you buy—and keep on giving it to you, year after year?

If you have ground enough for a fair-sized garden, you have room enough for fruit. A single tree will yield from 50 to 150 quarts of fruit. We have seen 20 16-quart baskets taken from a single tree, under regular commercial culture. A good young apple tree will give from two to four barrels of fruit.

Fruit trees require so little care, as compared to vegetables, that your whole home orchard will not take many hours work during the entire year.

You can grow as fine peaches and apples as sold anywhere if you plant the right kind of trees.

APPLES

	Each	10
No. 1 grade, 11-16 and up	\$0.65	\$5.50

Summer Varieties

YELLOW TRANSPARENT—Fruit a clear yellowish-white. Begins to ripen in July. Especially hardy.

EARLY HARVEST—Much prized by the housewife. The Early Harvest has been in cultivation for more than one hundred years and this is a proof of its excellence. It is a very early variety, ripens in July and August. It is desirable for the home orchard because of its earliness and its excellence for dessert and culinary purposes.

RED ASTRACHAN—Earliest and best red apple. Good size, dark red. Vigorous, hardy and productive.

DUCHESS OF OLDENBURG—Medium: pale yellow, streaked red; bears young and is a good cropper; useful for fall purposes; fine for market with a great demand.

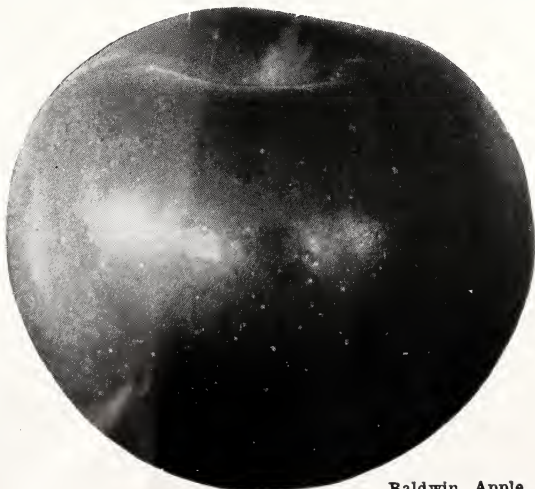

WEALTHY—Large; brilliant red; rich sub-acid flavor; excellent quality; good keeper; highly recommended; keeps well in storage.

MAIDEN'S BLUSH—Beautiful yellow apple with red cheek. One of the finest quality apples grown for eating or cooking.

Winter Varieties

BALDWIN—This is the leading commercial variety in the American markets. It is to apples what Elberta is to peaches and Montmorcency is to cherries. One of the best storage apples for export trade. Thousands of barrels of this fruit are exported to England annually. Baldwin is planted extensively and succeeds wonderfully well in all states east of the Mississippi. Fruit large, bright red, crisp, rich.

GANO—An improved Ben Davis, adding to the good qualities of that variety a much handsomer fruit of deep, dark red, that brings a ready sale in market. Dec.-March.

Baldwin Apple

APPLES—Continued

GRIMES GOLDEN—Medium to large size; skin golden yellow, sprinkled with gray dots, flesh crisp, tender, juicy, sprightly, very good to best. Tree is very hardy and productive, and one of the best fillers, as it comes into bearing very early. Grimes' Golden is one of our few best sorts. Dec.-Apr.

JONATHAN—A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long lived, productive, and an early bearer. Will keep well without special care and also stand much handling. Nov.-Jan.

NORTHERN SPY—A hardy, large, red winter apple. Flesh juicy, rich, crisp, tender, aromatic, of good flavor. Tree very healthy, strong grower, rugged. Blossoms very late, escaping frosts. Its large size, handsome appearance and super-fine quality give it first rank for fancy trade. Dec.-Mar.

ROME BEAUTY—Large round; mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points; always sells and always brings good prices. With an established reputation due to real merit. Good grower; blooms late; bears heavily every year; is adapted to a wide range of soils, elevations and conditions. In Ohio, Pennsylvania, New York, West Virginia and Maryland will make more money than some of the sorts which are not a large part of the total number of trees in commercial orchards. Reliability, due to being frost-proof, strong-growing and sure bearing, make it a favorite with the grower.

R. I. GREENING—Large; flesh yellowish, firm, fine grained, crisp. Fine cooking. Tree large and vigorous.

STAYMAN'S WINESAP—Dark rich red striped with crimson. Flesh tinged with yellow; firm, crisp, fine-grained, very juicy, sub-acid flavor. A good one.

FAMEUSE (Snow Apple)—Medium size; deep crimson; flesh snowy white, melting and delicious, one of the finest dessert fruits. Oct.-Dec.

TALMAN SWEET—The leading sweet apple for winter use. Pale, creamy yellow; it has a fine sweet flavor that makes it popular. Strong, large tree, bears at about 8 years. Heavy yielder; everyone likes it. Large trees, each 45c; 10 for \$4.00. Medium trees, 35c; 10 for \$3.00.

WINTER BANANA—Fruit large, perfect in form; golden yellow, and beautifully shaded and marbled with bright, crimson red; flesh lemon-yellow, fine grained, sub-acid, rich, aromatic flavor and of the highest quality. A good keeper. Tree remarkably strong grower, and on account of its great hardiness, will thrive in any climate. Its early

Delicious Apple

bearing is something simply wonderful, generally producing a fine crop the second year. A valuable market variety. Very popular especially in New York and Pennsylvania. Nov.-Jan.

YORK IMPERIAL—An important commercial apple. Can be kept till new crop comes. Medium sized, round, irregular; greenish-yellow overlaid with bright red stripes; flesh tender, firm, crisp, juicy, extra good flavor. Tree is a vigorous grower.

DELICIOUS—No new variety has ever so quickly gained popularity. Fruit large, dark red, flesh fine grained crisp, of highest quality.

Rome Beauty

SPECIAL MOYER'S PRIZE

MOYER'S PRIZE—The finest Apple of recent introduction. The original tree has been a yearly cropper for the last 35 years. Tree a good grower; fruit medium to large; yellow skin with blush on sunny side. Flesh crisp, white, juicy, melting, very fine and highly aromatic. Late keeper. Will keep till May. Introduced by the Laketon Nurseries.

No. 1 Grade, 4 to 6 ft. 11-16 up, Each Per 10
\$0.90 \$8.00

CRAB APPLES

HYSLOP—Deep crimson fruit with a sub-acid; pleasant flavor; very desirable and well known.

WHITNEY—The tree is a hardy, thrifty, upright grower, and comes into bearing when young; it is a very productive variety. The flesh is yellowish, crisp, juicy and splendid for eating and cider. August and September.

Kieffer Pear

sirable. Fruit almost covered with light russet, becoming reddish-brown when ripe. Large, beautiful, melting, sweet and rich.

DUCHESS—A large pear, late, good quality; bears young. A fine eating pear right from the tree.

SECKEL—A beautiful and delicious little pear that is the standard of excellence in its class. One of the richest and highest flavored pears known, always in demand for desserts and luncheons. Somewhat slow growth. Sept. and Oct.

KIEFFER—This is the most popular pear grown for commercial use. Good size, rich color; tree vigorous and bears well. The blight does not hurt the Kieffer. Fruit should be picked at maturity and ripened indoors. Season Oct. to Nov.

CLAPP'S FAVORITE—Large; pale lemon yellow with red cheek; flesh of fine texture, melting buttery. Juicy, with a rich vinous flavor; good for market and kitchen. August.

WILDER—One of the very earliest pears, of excellent quality. Of medium to large size, irregular, bell-shaped; pale yellow with shadings of russet-red. Early August.

DWARF PEAR

No. 1 Grade, 3 to 4 ft., 5-8 up, each
80c; Per 10, \$6.50.

VARIETIES — Duchess, Bartlett, Flemish, Clapps Favorite.

PEARS

The Pear is closely related to the apple and like the apple thrives on many soils. It is noted for its delicate, mild, sweet and delicious flavor, and the melting, buttery, juicy texture of the flesh, surpassing the apple in these respects.

No. 1 grade, 4 to 6 ft. 11-16 up, each, \$0.90, Per 10, \$8.00.

BARTLETT—Summer. A great favorite in all orchards and in all markets because of delicious flavor and fine quality. Large, coloring to waxen yellow with red blush; juicy, melting, highly flavored.

FLEMISH BEAUTY—Large size; greenish yellow and brown; rich and juicy. An old and highly esteemed variety; a strong grower and a great bearer; hardy and de-

Bartlett Pear

CHERRIES

While the cherry tree is of rather slow growth it is so sturdy and hearty and bears for so many years a large, bountiful crop under the most adverse conditions, that a few of them are the most valuable tree that a home man can plant.

SOUR CHERRIES

	Each	Per 10
No. 1 Grade, 4 to 5 ft., 1 1-16, up	\$0.80	\$7.50

EARLY RICHMOND—Best early cherry, much like Montmorency, except perhaps a little smaller and a few days earlier; bear young and very abundantly; best home canner and pie cherry that grows. Sells well on all markets.

DYEHOUSE—Bright, red, prolific bearer. The fruit is mildly sub-acid, excellent variety for canning, good shipper. Free and vigorous. Last of May.

LARGE MONTMORENCY—We have a fine lot of Cherry trees to offer in two grades. All one year. One year trees are the very best trees to be had, and of course, the very best to set for any and every purpose. There is more money in Montmorency Cherries than any tree fruit that can be planted. There are only two or three restricted areas in the whole United States, where Montmorency Cherries do well, and the best district is the North Central states. The market is unlimited and the supply is short, with the demand for canned cherries on the increase.

ENGLISH MORELLO—Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes. August.

Early Richmond

SWEET CHERRIES

	Each	Per 10
No. 1 Grade, 4 to 6 ft., 11-16, up	\$0.90	\$8.50

WINDSOR—Of Canadian origin, noted for its hardness of both tree and bud, and its abundant bearing. Cherry is large, dull red, always a money maker. Best quality.

GOV. WOOD—A large, light yellowish cherry, excellent flavor. Ripens in June and generally liked.

BLACK TARTARIAN—A favorite everywhere; large, purplish black, firm flesh, fine flavor.

Governor Wood Cherries

NAPOLEON—Tree medium size, fruit borne generally in twos, very large. Excellent bearer.

FING—Very large, dark red; fine quality; trees are hardy and prolific.

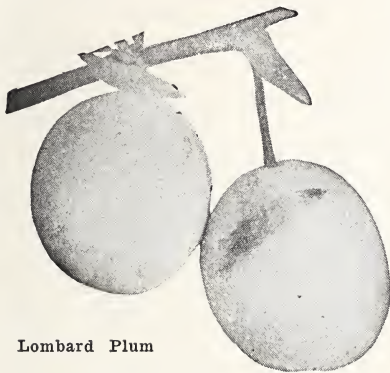

YELLOW SPANISH—Large, handsome, sweet cherry with light red cheek, firm and delicious. Tree vigorous in growth and productive. Late June.

LAMBERT—Fine sweet variety, one of the largest of all cherries, dark purple red, turning almost jet black when ripe. Flesh firm, rich, juicy, enormous bearer. Late July.

PLUMS

The plum, like a pear, succeeds best in a rather heavy soil with some clay and being generally free from disease is profitable. They should be gathered a few days ahead of use that they may develop their perfect flavor. For family use they especially do well in poultry yards, or where the hogs keep the ground free from fallen fruit. The varieties should be mixed.

No. 1 Grade, 4 to 6 ft., 11-16 up Each Per 10
\$0.80 \$7.50

Lombard Plum

LOMBARD — A favorite for canning and culinary purposes. Of medium size, oval, violet-red. Flesh is yellow, juicy, pleasant and good. Adheres to the stone. Good market variety. The tree is strong and productive, bearing when quite young. Ripens late in August.

ERADSHAW — Remarkably good early plum. This variety is a very large dark red. Flesh is yellow, juicy and good. A valuable market variety. Tree is an erect, vigorous grower. Middle of August.

BURBANK—Successful almost anywhere. The fruit is of very large size, the color cherry red, mottled. The flesh is yellow, sweet and firm. It is fine for keeping and shipping. The

tree is a vigorous grower, but so straggling that it requires sharp pruning. It ripens in August.

ABUNDANCE—A beautiful yellow, heavily overspread with purple-carmine; large to very large; the flesh is yellow, very juicy, sweet and quite firm; skin tough. The tree is a strong, thrifty grower, very hardy and prolific. The fruit stands shipping well to distant markets. July.

GREEN GAGE — Rather large, oval, greenish. Flesh juicy, rich and delicious. Middle of August.

MOORE'S ARCTIC — Purplish black plum with a thin bloom. Fruit is small to medium; flesh juicy, sweet and fine-flavored. Tree is healthy, a regular and abundant bearer. August.

YELLOW EGG—A beautiful yellow, egg-shaped plum of the largest size; the flesh is yellow, and is somewhat coarse; always clings to the stone. This is an excellent variety for canning and always brings a good price on the market. The tree is a prolific bearer and a good grower. Late August.

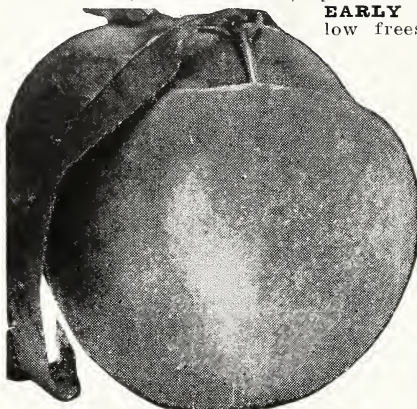

Burbank Plums

PEACHES

Every home should have a few peach trees as there is no more delicious fruit in its season, and that purchased on the market is often of an inferior quality because of the necessities of picking comparatively green.

No. 1 Grade, 4 to 5 ft. 9-16, up Each Per 10
 \$0.45 \$4.00

Early Crawford

EARLY CRAWFORD—Mid-season yellow freestone. Better quality, hardier, better in every way than Old Crawford Early. Deep yellow, bright blush; sweet, rich, fine quality. Trees hardy, healthy, vigorous, good bearer. Ripens 7 days before Elberta.

LATE CRAWFORD—A very large yellow freestone of the finest quality. Ripens early in September.

ELBERTA—The leader of all peaches. The greatest commercial variety on the market. Fifty per cent or more of all the peaches planted are Elberta. It will thrive where any peach can be grown. It is hardy and a uniform cropper. Large, yellow with red cheek; juicy. Freestone. Season medium, ripens in early August.

CHAMPION—Large and beautiful. Flavor delicious, sweet, rich, juicy; skin creamy white with red cheek. Freestone. It is very hardy and has withstood a temperature of 18 degrees below zero and produced a good crop. Season just before the Elberta. Last of July.

NEW PROLIFIC—Early, ripens before Elberta. Yellow, heavy bearer, needs thinning; of best quality. Good-sized when properly grown. No peach is better.

KALAMAZOO—A big money-maker. Midseason. Yellow; heavy bearer.

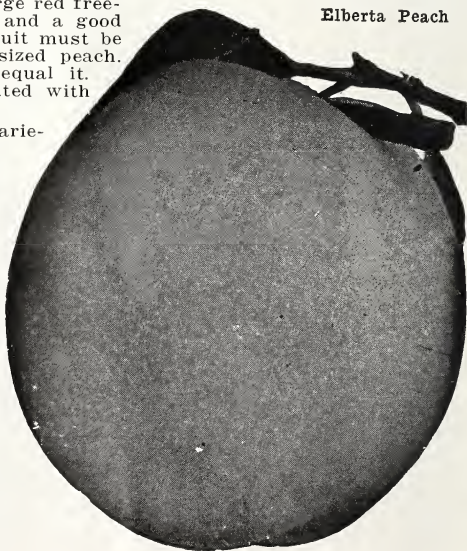

CARMAN—Medium to large red freestone; very fine quality and a good shipper; heavy bearer; fruit must be thinned to insure good sized peach. No other peach will equal it. Meat very juicy and tinted with red to the seed.

J. H. HALE—A newer variety, much like the Elberta but is claimed to ship well and hang on the tree for a longer season than the Elberta. Yellow freestone, good quality.

FITZGERALD—The Fitzgerald is of Canadian origin and it is one of the hardest peaches both in tree and bloom. Large yellow, freestone, firm juicy.

HEATH CLING—The old standby in the cling. Large, white, very juicy and sweet. Season first to middle of September.

Elberta Peach

Add a few more peach trees to your collection. You will never be sorry when they begin to bear.

QUINCE

The Quince is always in demand, although its commercial value has changed but little for many years. Quinces are largely used in cooking, canning and preserving, as they have a delicious flavor.

	Each	Per 10
No. 1 Grade, 3½ to 4 ft., 1-2 up	\$0.80	\$7.50
Med. Grade, 3½ to 3 ft.70	6.50

ORANGE—Large brilliant yellow; flesh tender, flavor good.

CHAMPION—Good bearer; very large; good keeper.

MEECH'S—Ripens earliest of all; very large.

GRAPES

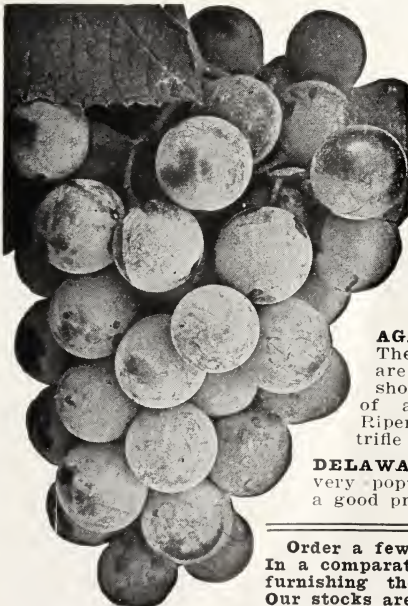

Grapes are one of the most productive and hardy fruits that we have. They can be grown in small spaces and trained up the sides of buildings or along fences, occupying very little room.

	Each	Per 10
2 yr. No. 1	\$0.25	\$2.25

CONCORD—The fine old popular market variety and the leading commercial grape of today. A large, purplish black grape, very hardy and productive. The bunches are large and well filled and vines vigorous, hardy and free from disease. Does well on any soil and is the biggest money maker in grapes. Is well and favorably known wherever grapes are sold and has an established reputation on the market. Is considered the standard by which grape prices are judged. We have a large stock of Concord in all grades this year and are offering them at bargain prices. These plants were all grown and graded under our personal supervision and we guarantee them to be exactly as represented and to be of exceptional value at the price asked.

MOORE'S EARLY—Very large and round. Color black with a blue bloom. Quality very fine and sweeter than Concord. They stand handling and shipping and have an established reputation on the market. Vines hardy and productive. Ripens early.

WORDEN—Large, round grape, black in color. Flesh has a fine flavor unequalled by any other grape; delicious and melting; excellent for home use and a good market variety. Does not produce so heavily as the Concord so it is not planted so extensively for market. Vines are thrifty and hardy. Ripens with the Concord.

Concord Grapes

NIAGARA — The standard white grape of the country. Grape large, slightly oval in shape, pale yellow in color with a white bloom. Quality of the best. Bunches are large and compact. Vines vigorous, hardy and productive. Ripens with the Concord.

BRIGHTON—In our estimation the best all-round red grape. Bunches large, long and shouldered. Berries are medium size, skin thin, flesh very tender, sweet and best quality. Ripens early and is productive and vigorous.

AGAWAM—Deep red or maroon. The large meaty berries which are borne in extra large, loose-shouldered bunches, are juicy and of a delightful aromatic flavor. Ripens about with Concord or a trifle later. Strong healthy grower.

DELAWARE—Small, red, delicious, a very popular eating grape; commands a good price on the market; hardy.

Order a few fruit trees with your shrubs. In a comparatively short time they will be furnishing the table with delicious fruit. Our stocks are complete, so send your order now.

BLACKBERRIES

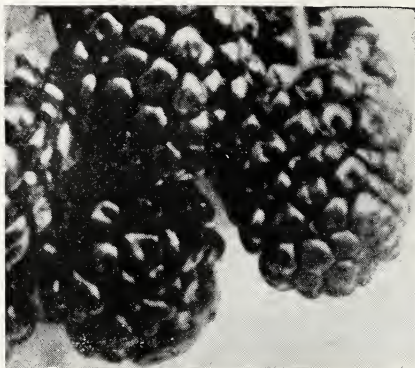

Each 7c; 10, 60c; 100, \$3.50.

SNYDER—Very hardy, great producer, medium size and one of the best known varieties of blackberries.

RATHBURN — The largest and most productive and best flavored blackberry ever produced.

EARLY HARVEST—Anyone with a good local market will find this variety very profitable as it bears early and over a long season. Fruit medium sized, good quality, a very sweet delicious flavor.

LUCRETIA—Is an old standard variety, is well liked and popular and profitable. Berries large, long, sweet, juicy and good quality. Vines very productive, hardy, thrifty, and succeeds everywhere.

Lucretia Blackberries

RASPBERRIES [Spring Only]

Each 7c; per 10, 60c; per 100, \$3.00.

CUMBERLAND—Largest of all black caps; firm, a good shipper, one of the most profitable market berry. Very choice black cap.

KANSAS—Strong, vigorous grower. Will grow with less care than any other of the "tip" varieties.

GREGG—Large, showy, black, firm, and will ship well. Hardy and vigorous grower. Ripens about mid-season.

CUTHBERT—Large, dark crimson, sweet, rich, highly flavored.

COLUMBIAN—Very large, deep purplish-red; sweet and highly flavored; for kitchen and market. Bush vigorous and large grower. Each 7c; per 10, 60c; per 100, \$4.00.

STRAWBERRIES [Spring Only]

SENATOR DUNLAP—Large, handsome, rich, fine-flavored, dark red berries, which are uniform in size and shape and very attractive. 25c per 10; \$1.00 per 100; \$8.00 per 1000.

GIBSON—Dark red, excellent quality and flavor, firm, stands shipping as well as any variety known. 25c per 10; \$1.00 per 100; \$8.00 per 1000.

HAVERLAND—Wonderful productiveness, excellent flavor, one of the best. 25c per 10; \$1.00 per 100; \$8.00 per 1000.

LLOYDS FAVORITE—25c per 10; \$1.00 per 100; \$8.00 per 1000.

DR. BURRILL—Strong, vigorous plants, heavy producer of high class berries. 25c per 10; \$1.00 per 100; \$8.00 per 1000.

SUPERB—Very large, dark red and glossy; fine quality. Begins to bear in June. Immense crops. 50c per 10; \$2.00 per 100; \$18.00 per 1000.

MASTODON—Large size and great productiveness that makes Mastodon stand out away ahead of other ever-bearers. 50c per 10; \$2.50 per 100; \$20.00 per 1000.

CURRENTS 2-YR.

Cherry, Fays, White Grape, Wilder. Each 25c; per 10, \$2.00.

GOOSEBERRIES 2-YR.

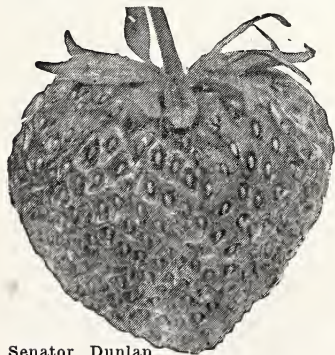

Downing, Houghton, Pear. Each 30c; per 10, \$2.25.

ASPARAGUS

2 yr. roots, each 5c; per 10, 40c; per 100, \$2.50.

RHUBARB OR PIE PLANT

Divided roots, each 15c; per 10, \$1.25 per 100, \$8.00.

Senator Dunlap

MAKING THE HOME BEAUTIFUL

More attractive homes! Homes larger, better built, more convenient, more attractive. Not only for more heat, more light, more comfort, but also more beauty.

Soft Maple

When God made this country it was a place of trees, shrubs and flowers. Today men are beginning to realize that God's way is the best and everywhere men and women are striving to retain as much of that former beauty as they can. Parks and reserves for everybody, playgrounds for children, green lawns and shrubs and trees and flowers. Civic centers for making better citizens.

Your own home, too, may be likewise a center of beauty at how small a cost many people do not realize. A little loving care is the largest item. Making the desert blossom like the rose is figurative, but making the home grounds more attractive is one step in the process.

SHADE TREES

MAPLE

A very handsome tree attaining large proportions, its spreading branches form a dense, round head and is especially desirable for street or lawn planting.

SOFT MAPLE—A rapid growing tree of large size, irregular rounded form; foliage bright green; for streets and parks; attains about the same height as Norway.

6-7 ft., 1 to 1½ in. caliper, each \$1.00; 7 to 9 ft., 1¼ to 1½ in. caliper, each \$1.25; 9 to 10 ft., 1½ to 2 in. caliper, each \$1.50; 10 to 12 ft., 2 to 2½ in. caliper, each \$2.00; larger sizes, from 3 to 5 in. write for prices.

HARD MAPLE—A well known native tree, valuable for the production of sugar and wood; very desirable as an ornamental shade tree.

1½ to 2 in.	\$2.50
2 to 2½ in.	3.75
2½ to 3 in.	5.75
3 to 3½ in.	9.75

NORWAY MAPLE — A very handsome tree attaining large proportions, its spreading branches form a dense, round head and is especially desirable for street or lawn planting. Has five lobe leaves, bright green, lighter underneath and smooth on both surfaces, fading to yellow and gold.

7 to 8 ft.	\$2.25
1¼ to 1½ in.	3.25
1½ to 2 in.	4.75
2 to 2½ in.	5.75

For larger size, write for prices.

Norway Maple

SCHWEIDLER—One of the most beautiful of the shade trees. In early spring the young leaves are bright red, changing to purplish green. Tree has a round, compact head.

4-5 ft., 3-4 to 1 in. caliper	\$2.75
5-6 ft., 1 to 1¼ in. caliper	3.50
6-7 ft., 1¼ to 1½ in. caliper	4.75
7 to 9 ft., 1½-2 in.	5.75

ASH LEAVED (Box Elder)—A rapidly growing tree with spreading branches. Frequently planted as an ornamental, but especially popular as a wind break or for timber because very hardy, withstanding cold and drought.

6 to 7 ft., 1-1¼ in. caliper	\$0.80
7 to 8 ft., 1¼-1½ in. caliper	1.25
8 to 10 ft., 1½-2 in. caliper	1.50

BIRCH

A beautiful tree with white bark and in age spreading and pendulous branches. Very effective for landscape.

WHITE BIRCH—Of wonderful grace and beauty. Tall, vigorous with slender branches; foliage colors brilliant in fall, and its bare white trunk and branches are very beautiful in winter.

4 to 5 ft.	\$1.75
5 to 6 ft.	2.25
6 to 8 ft.	2.75
8 to 10 ft.	3.50

CUT LEAVED BIRCH—Trembling, vigorous and hardy. A most beautiful tree with its leaves trembling in the lightest breeze. Its bark glistening from bright foliage and sparkling in the sun.

4 to 5 ft. B. & B., 35c extra	\$2.00
5 to 6 ft. B. & B., 40c extra	2.75
8 to 10 ft. B. & B., 50c extra	4.25
10 to 12 ft. B. & B., 50c extra	5.75

ELM

MOLINE—A valuable new type, compact but fast growing habit; large dark leaves, smooth glossy bark.

8 to 10 ft.	\$2.50
10 to 12 ft.	3.25

AMERICAN — Well known, graceful dependable tree.

4 to 5 ft.	\$0.75
5 to 6 ft.	1.00

ASH

A well known native tree; very straight with broad, round head and dense foliage that is dark green above and light silvery beneath, fading to golden yellow. A beautiful and desirable shade tree.

EUROPEAN MOUNTAIN—An ornamental

deciduous tree with beautiful foliage which turns orange-red in the fall. The fruits are showy and often remain all winter, if not eaten by the birds. Not particular as to soil.

4 to 5 ft.	\$1.00
5 to 6 ft.	1.25

8 to 10 ft.	1.50
10 to 12 ft.	2.00
2½ to 3 in.	3.50

SIMONI POPLAR—A recent introduction and a very satisfactory tree Of rapid pyramidal growth, resembling Lombardy poplar, but more healthy than the latter variety. Can be used to advantage wherever a tall, pyramidal tree is desired.

5 to 6 ft.	\$1.00
8 to 10 ft.	1.50
10 to 12 ft.	2.00
2½ to 2¾ in.	3.50

SCARLET MAPLE—This is a very beautiful ornamental tree and is in great demand for street, lawn and park planting. A very rapid growing, hardy shade tree. Thrives equally well on well drained or low swampy, wet locations. The foliage is of an attractive, silvery color and the tree is bell shaped. Should be planted in large quantities.

5 to 6 ft.	\$1.25
6 to 8 ft.	2.00

GINNALA—A low growing, very hardy tree. Beautifully colored foliage in the spring and fall of the year. Leaves somewhat similar in shape to the Japanese Maple. Hardier than any other maple. Used very often in shrubbery planting, windbreaks and screens.

Dwarf, 5 to 6 ft.	\$1.50
Dwarf, 6 to 8 ft.	2.00

TULIP TREE

A tall, pyramidal trunk rises to a great height and is clothed with a splendid foliage of large, glossy leaves; large, tulip-shaped flowers are borne in the spring, greenish yellow and orange. One of the most distinguished of tall trees.

3 to 4 ft.	\$1.00
4 to 5 ft.	1.25
5 to 6 ft.	1.50
6 to 7 ft.	2.00
7 to 9 ft.	2.75
9 to 12 ft.	3.75

POPLAR

Attains a height of from one hundred to one hundred and fifty feet; well known for its erect rapid growth and tall, spiry form; indispensable tree for landscape gardening or to break the monotony of most other trees.

LOMBARDY POPLAR—A very tall and graceful tree, often attaining a height of 100 feet. It is splendid for backgrounds or borders as its tall and spiry growth makes it invaluable for landscape gardenings. A beautiful specimen tree.

A TWO-FOLD OBJECT

Landscape has a two-fold object—beauty and utility. The plan must provide for pleasing views, beautiful foliage and charming flowers, the whole making a harmonious picture. It must also provide for convenient walks and drives, ease of handling, and, not the least important, economy of space.

WEeping TREES

CATALPA, BUNGEI—Fine for parks, lawns or cemeteries. Called by many the "Umbrella Tree." Has a dome-shaped head, large soft leaves. It is our finest Catalpa and very ornamental. Many times you will see them set on each side of a walk.

1 yr. head	\$2.25
2 yr. head	2.75

TEAS' WEEPING MULBERRY—Willowy drooping, or weeping branches. Very ornamental, 3 to 5 ft. at \$3.50 each; 2 for \$6.00.

1 yr. head	\$2.75
2 yr. head	3.75

WILLOW

A medium sized tree with compact habits, leaves shiny dark green and fragrant when bruised, the odor resembling the Bay tree.

WISCONSIN WILLOW — Hardy, strong, beautiful, weeping, and quick grower.

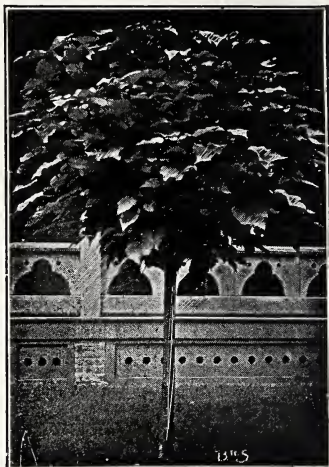

5 to 6 ft.	\$1.00
6 to 7 ft.	1.25
7 to 8 ft.	1.50
8 to 10 ft.	2.00

GOLDEN WILLOW—A strong and the most vigorous grower of all the weeping willows. Used for planting in low places or on the banks of streams, springs, lakes or ponds, making a very beautiful effect.

5 to 6 ft.	\$1.25
6 to 8 ft.	1.50
8 to 10 ft.	2.00

PUSSY WILLOW—You can grow them on your own lawn. Enjoy these dainty silvery flowers every winter. A beautiful round shrub in summer. Wherever you have room for a Lilac or Snowball, you have room for a Pussy Willow. Use them for tall screens or back-grounds.

3 to 4 ft.	\$.75
4 to 5 ft.	\$1.00

Catalpa Bungei

Flowering Trees

BECHTEL'S FLOWERING CRAB—The most beautiful of the flowering crabs. The trees rarely grow over twenty-five feet, and bloom when quite young. At a distance the fragrant, delicate pink flowers look like dainty little roses.

2 to 3 ft.	\$1.25
3 to 4 ft.	1.75
4 to 5 ft.	2.25

P A U L'S FLOWERING THORN — Flowers deep crimson scarlet, very double. This is one of the most attractive trees for specimen planting or groups, as showy in fruit as when in flower.

2 to 3 ft.	\$1.25
3 to 4 ft.	1.75
4 to 5 ft.	2.25

Our shrubs are large beautiful specimens and are not to be compared with mail order sizes. Fine for groups or single specimens.

Wisconsin Willow

ORNAMENTAL SHRUBS

A good collection of Shrubs is not only an unfailing source of pleasure but is absolutely indispensable to the well arranged lawn. Nature plants shrubs with lavish hand along the borders of the woodland. The effect is always restful and beautiful. The attractive home is the one neatly planted with Trees, Shrubs and flowers. Shrubs planted along the borders, massed into the corners, against the porches and sharp angles of the house will greatly enhance the artistic value of any home. Shrub plantings are the harmonizing feature which link the trees, buildings and lawn into one harmonious whole and give that finishing touch of hominess so greatly desired.

ROSE OF SHARON—(Altheas). Eight to ten feet high, resembling small flowering tree; planted closely together they make a good flowering hedge. Blossoms late in the fall. A number of colors.

Red, 18 to 24 in. 35c; 2 to 3 ft. 40c; 3 to 4 ft. 50c.

White, 18 to 24 in. 35c; 2 to 3 ft. 40c; 3 to 4 ft. 50c.

Pink, 18 to 24 in. 35c; 2 to 3 ft. 40c; 3 to 4 ft. 50c.

Purple, 18 to 24 in. 35c; 2 to 3 ft. 40c; 3 to 4 ft. 50c.

Tree form, red, white, pink, purple, 3 to 4 ft. \$1.00; 4 to 5 ft. \$1.50.

BUTTERFLY BUSH— This shrub of comparatively recent introduction has grown into favor almost immediately. It is a semi-herbaceous plant, by which we mean in some latitudes it will die down to the ground during winter, and while perfectly hardy, we recommend covering the roots with manure, leaves, or other material as winter approaches, as it will help to produce a heavy growth the next season. It is very hardy, blooms the first season, usually from June until frost. The flower head frequently being ten inches long.

2 to 3 ft.50c
3 to 4 ft.60c

Ornamental Shrubs

SHRUBS—Continued

CLETHRA—(Sweet Pepper Bush)—A native shrub, to four feet, bearing profusely spikes of yellowish-white scented flowers in August.
 15 to 18 in.60c
 18 to 24 in.75c

ARALIA (Pentaphylla)—Five leaved Aralia. This is an unusually hardy shrub, thriving in very adverse soil and city conditions. The flowers are inconspicuous but the foliage is very attractive.

2 to 3 ft.50c
 3 to 4 ft.60c

FLOWERING ALMOND—This old-time favorite with its wealth of double, pink flowers, strung along the stems like so many gems, should find a place on every lawn. Their wealth of blossoms coming to delight us at a time when there are few other shrubs in bloom. Do not compare our own rooted plants with budded or grafted ones.

White, 2 to 3 ft.50c
 3 to 4 ft.65c
Pink, 2 to 3 ft.65c
 3 to 4 ft.75c

Flowering Almond

CALYCANTHUS (Sweet Scented Shrub)—The popular, sweet-scented shrub. Blooms in June to July, has a very dark chocolate colored flower of wonderful fragrance. A branch of this shrub will scent the house or room with a wonderful, rich, spicy fragrance for days. The shrub has a beautiful waxy, dark, glossy green foliage that is sub-tropical in appearance. It is hardy.

12 to 18 in.50c
 18 to 24 in.60c

Cornus-Siberica

CORAL BERRY — Very similar to Snowberry except that its berries are red.

2 to 3 ft.35c
 3 to 4 ft.40c

CORNUS— (Siberica). A tall shrub with bright, coral-red branches, making it especially ornamental during the winter. Has abundant small white blossoms borne in early summer and followed by white fruit. Foliage is a bright green and very attractive.

2 to 3 ft.40c
 3 to 4 ft.50c

Lutea—Yellow branched variety.

2 to 3 ft.40c
 3 to 4 ft.50c

Elegantissima—Variegated Leaf, dwarf shrub, red bark, white and green foliage.

2 to 3 ft.60c
 3 to 4 ft.75c

Our shrubs are large beautiful specimens and are not to be compared with mail order sizes. Fine for groups or single specimens.

Do not delay another season in planting at least some shrubs, for they add materially to the beauty and attractiveness of any home.

SHRUBS—Continued

THE NEW BEAUTY BUSH

An E. H. Wilson (Arnold Arboretum)
Introduction from China.

KOLWITZIA AMABILIS—In early June it is a mass of arching sprays of pale pink abelia-like flowers, followed by curious cob-webby fruits; the flowers have mottled orange throats. This plant is perfectly hardy as far north as Montreal, erect and twiggy in form, and prefers a sunny situation. 2 yr. plants, Mail Size, \$1.00 each, 3 for \$2.40, postpaid.

CYDONIA (Japonica) (Japan Quince)
—Common garden form, growing from 3 to 6 feet with spreading, spiny branches. The scarlet-red flowers appear before the leaves and are followed by globular fruits from one and one-half to two inches high.

12 to 18 in.	40c
18 to 24 in.	50c
2 to 3 ft.	65c

Beauty Bush

CARAGANA (Siberian Pea)—Tall shrub with fine, feathery foliage and yellow flowers in May. Fine for mixed plantings.

2 to 3 ft.	40c
3 to 4 ft.	50c

GOLDEN LEAVED ELDER—A variety with golden yellow foliage. A valuable plant for producing contrast when planted with other shrubs. Grows to a height of about 8 feet, and is of vigorous, spreading habit. The berries, as one of the American Elder, are edible, but more red in color. Should have full sun to give best effect. Grows well on all soils and can be pruned into a neat compact little bush. One of the best golden foliaged shrubs. Blooms white in July, followed by large clusters of berries.

3 to 4 ft.	50c
4 to 5 ft.	60c

CUT-LEAVED ELDER—Its foliage is finely split up like the fingers of the hand. Very fine and interesting; besides it bears great clusters of useful berries.

3 to 4 ft.	50c
4 to 5 ft.	60c

DESMODIUM (Japan Clover)—2 to 3 ft.	60c
3 to 4 ft.	75c

DEUTZIA (Pride of Rochester)—This is a choice, almost new variety that should be planted more generously. It excels in vigor, size and freedom of bloom and length of panicles. The flowers are double white, tinged on outer border with pink, blooms in June; earlier than other kinds. Fine for single planting or groupings.

2 to 3 ft.	40c
3 to 4 ft.	50c

Deutzia

DEUTZIA (Continued)

DEUTZIA CRENATA—Flowers are much like those of *Pride of Rochester* only are full rose pink, and are borne on long slender branches in June. Bush is real hardy and a vigorous grower; there should be more of these planted.

2 to 3 ft.40c
3 to 4 ft.50c

DEUTZIA LEMOINEI

Spreading shrub to three feet in height. Its pure white flowers appear in broad panicles. A very desirable shrub, more vigorous and with more showy flowers than some of the other forms. Excellent for forcing. Very hardy.

18 to 24 in.40c
2 to 3 ft.50c

DEUTZIA GRACILIS—Dwarf drooping branches are growing, dense, bushy; its wreathed with pure white blossoms in May. It is fine as a border plant, and ideal for single plants where a low shrub is wanted.

12 to 15 in.40c
15 to 18 in.50c

FRINGE, PURPLE (Smoke Tree)—A bush 10 ft high with simple obvate leaves and brown bark, flowers purple on long panicles.

18 to 24 in.60c
2 to 3 ft.75c

FORSYTHIA FORTUNEI—Few if any, of the spring-flowering, hardy shrubs can surpass the splendor and brilliancy of the *Forsythia*. Both the grace and beauty give them a prominent place in all shrub plantations. Of upright, vigorous growth, foliage rich, dark green and lustrous. Flowers brilliant golden yellow.

2 to 3 ft.40c
3 to 4 ft.50c

FORSYTHIA INTERMEDIA—A handsome upright bush with deep green foliage turning to a purplish tint in the autumn. It is the first to greet the spring time with its shower of golden yellow trumpet-shaped flowers that appear in advance of the leaves.

2 to 3 ft.40c
3 to 4 ft.50c

FORSYTHIA SUSPEN-

SA—This variety has a peculiarly beautiful droop. Pretty bell-shaped flowers before the grass grows or the leaves start in the early spring. Very hardy, should be in every collection of shrubs.

2 to 3 ft.40c
3 to 4 ft.50c

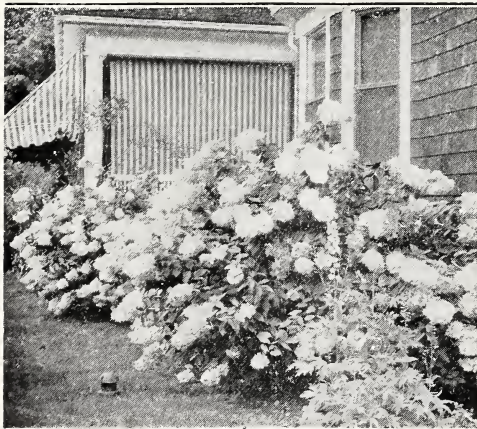

HYDRANGEA, P. G.

A beautiful, tall shrub bright green foliage; flowers in Aug. and Sept. Beautiful as a border.

12 to 18 in.35c
18 to 24 in.40c
2 to 3 ft.50c

Forsythia Fortunei

Hydrangea, P. G.

Honeysuckle

2 to 3 ft.	40c
3 to 4 ft.	50c

LILAC (Persian)—Grows 4 to 6 feet high, foliage small and flowers a bright purple borne profusely; very fine. One of the most fragrant flowers known.

18 to 24 in.	40c
2 to 3 ft.	50c
3 to 4 ft.	65c

HONEYSUCKLE (Tart., red, and pink)—All the honeysuckle bushes are similar as to habits and foliage. They grow 6 to 10 feet in height. Any of the stand pruning well. The beautiful pink blooms are fragrant and delicate followed by red berries which are borne in clusters.

2 to 3 ft.	40c
3 to 4 ft.	50c

HONEYSUCKLE (Morrowii) White)—This bush has a slight droop. It is a sturdy, strong grower. Its white blooms are followed with red berries. It is as good as the other varieties. A tall hedge or screen of honeysuckle bushes in assorted colors of flowers and berries is nice indeed where same can be used.

2 to 3 ft.	40c
3 to 4 ft.	50c

PHILADELPHUS (Mock Orange) — A sweet-scented dwarf form of Syringa. Beautiful, creamy white flowers with yellow centers in June. Adapted for planting in front of taller shrubs. Hardy.

2 to 3 ft.	40c
3 to 4 ft.	50c

Prices on shrubbery are for 3 yr. old stocky and fine. Small stock priced cheaper.

HYDRANGEA (Continued)

HYDRANGEA (Hills of Snow)—Almost all of the flowers are sterile. Very showy variety, excellent for borders.

2 to 3 ft.	40c
3 to 4 ft.	50c

HYPERICUM (Gold Flower)—Late fall bloomer and is highly prized for its great masses of golden flowers. Will grow on partial shade and very poor soil.

12 to 18 in.	60c
18 to 24 in.	75c

KERRIA, yellow—

12 to 18 in.	40c
18 to 24 in.	50c

KERRIA (Kerrioids) White—It grows from four to eight feet high and as broad as high. Very attractive. Flowers appear in early June in great abundance.

Philadelphus (Mock Orange)

PHILADELPHUS—(Continued)

PHILADELPHUS (Coronarius) — Great masses of sweet scented flowers in May and June. Popular for lawn planting and in gardens for several generations and its deserved popularity is increasing. Extremely hardy and vigorous.

18 to 24 in.	40c
2 to 3 ft.	50c

PHILADELPHUS (Lemoinei) — Beautiful creamy white flowers with yellow centers in June, entirely covering the plant. Adapted for planting in front of taller shrubs. Hardy.

18 to 24 in.	50c
2 to 3 ft.	60c

Philadelphus

PHILADELPHUS VIRGINALIS—This is a new and wonderful addition to the Mock Orange family but is far beyond anything in this line that has been brought out in the past. One of the most beautiful shrubs grown and once it becomes known will be planted on every home ground. Large double flowers completely cover the bush in early June.

18 to 24 in.	75c
2 to 3 ft.	\$1.00

PHILADELPHUS AUREA—Similar to Coronarius except that the foliage is a beautiful golden color.

12 to 15 in.	60c
15 to 18 in.	75c
18 to 24 in.	\$1.00

PRIVET, IBOTA—Hardy. Grows prettier each year. Being much used. Has a dense, spreading habit. White flowers. Black berries. Fine for large view breaking hedges.

2 to 3 ft.	35c
3 to 4 ft.	40c

PRIVET, VARIEGATED LEAF—12 to 18 in. 40c
18 to 24 in. 50c

RHUS (Glabra)—Tall growing with branching habits; foliage bright green, fading to scarlet in autumn; blossoms in June, with yellow flowers.

3 to 4 ft.	40c
4 to 6 ft.	50c
6 to 8 ft.	60c

RHUS, Aromatica—Spreading in growth; Leaves trifoliate aromatic.
18 to 24 in. 40c
2 to 3 ft. 50c

RHUS (Laciniata)—This variety with its deeply and finely cut leaves is very handsome, not quite so hardy as some of the other forms and not so tall growing.

3 to 4 ft.	40c
4 to 5 ft.	50c
5 to 7 ft.	60c

RUSSIAN OLIVE—For any one desiring a hedge plant of great merit the Russian Olive will be worth considering. Silvery white leaves make it very attractive.

3 to 4 ft.	50c
4 to 5 ft.	60c

SNOWBERRY (White)—A dwarf shrub with small foliage and small pink flowers in June, followed by great clusters of large white berries that hang on until winter.

2 to 3 ft.	35c
3 to 4 ft.	40c

SNOWBALL—Too beautiful and well known to need description. The name "Snowball" describes it exactly. Strong, hardy shrub.

18 to 24 in.	40c
2 to 3 ft.	50c
3 to 4 ft.	60c

Snowball

SPIREA

All the Spireas bloom extravagantly. This family contains more attractive varieties than any other. They range in height from dwarf to tall, color of blossom from white to red, and period of bloom from early April to August. All the species are very hardy, easily grown.

SPIREA VAN HOUTTEI

At the head of the list, as it is the most popular shrub known—the grandest of all the hardy Spireas. No one ever forgets the sight of one of these nice shrubs, or a hedge of them when in bloom. Forms a graceful pendulous shrub 4 to 6 feet high, and a fountain of pure white blossoms in May and June.

18 to 24 in.25c

2 to 3 ft.35c

3 to 4 ft.40c

Spirea Van Houttei

SPirea, ANTHONY WATERER

Bright pink. June

and July. A compact low-growing shrub with dense foliage usually deep green with occasional variegated leaves of pink and white on young growth. Flowers are borne in full flat clusters on erect stems.

12 to 15 in.35c

15 to 20 in.40c

SPirea BUMALDA—Similar to Anthony Waterer in growth and habit but with light pink flowers. White and pink.

12 to 18 in.35c

18 to 20 in.40c

SPirea FROEBELLI—Similar to Anthony Waterer in many respects, but taller. Dense heads of crimson flowers. The new foliage in Spring is red giving the shrub the appearance of being covered with flowers.

12 to 18 in.35c

18 to 24 in.40c

SPirea THUNBERGI—Extra early flowering species. It is spreading in growth with arching slender branches that are a perfect mass of minute flowers followed with exceptionally delicate green foliage.

12 to 18 in.35c

18 to 24 in.40c

2 to 3 ft.50c

SPirea DOUGLASSI—Very desirable with spikes of deep pink flowers July, August.

Pink 18 to 24 in.35c

2 to 3 ft.40c

SPirea OPULIFOLIA—Ornamental, bright foliage and double white flowers in June. Old flower heads turn to dark red. Striking and showy at all seasons.

2 to 3 ft.40c

3 to 4 ft.50c

Opulifolia, Aurea—Same as above except that foliage is golden.

2 to 3 ft.40c

3 to 4 ft.50c

SPirea, COLISA ALBA—A splendid companion to the Spirea, Anthony Waterer. Of dwarf, dense growth, with white flowers. In bloom all summer.

12 to 15 in.35c

15 to 20 in.40c

SPirea SALICIFOLIA—Willow-like foliage, shiny and attractive. Crowded with panicles of pink flowers.

White, 2 to 3 ft.50c

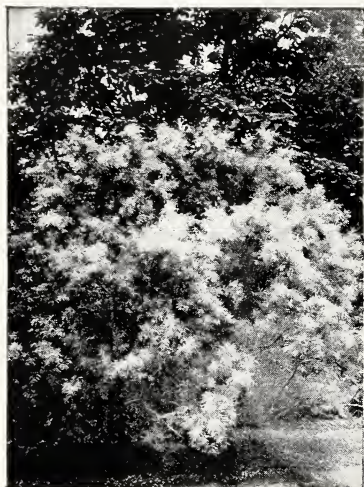

3 to 4 ft.60c

Spirea Anthony Waterer

TAMARIX HISPIDA—Grows 8 to 10 feet high at maturity and stands pruning well. A very handsome and distinct variety with dense bluish foliage. The delicate soft sprays of Carmine Rose blossoms are exceedingly attractive. Blooms in September when few other shrubs are in bloom. Stands winters well; should be more generously planted.

3 to 4 ft.	50c
4 to 5 ft.	60c

Tamarix

18 to 24 in.	50c
2 to 3 ft.	60c

WEIGELA ROSEA—The most popular of all the Weigelas. Foliage is a deep green and bush is a vigorous grower. Flowers are a bright rose color, appearing in greatest abundance in June, and more sparsely at intervals throughout the summer.

18 to 24 in.	35c
2 to 3 ft.	40c
3 to 4 ft.	50c

WEIGELA CANDIDA—Flowers are pure white; produced in great profusion in June; also more or less all summer.

18 to 24 in.	40c
2 to 3 ft.	50c
3 to 4 ft.	60c

WEIGELA EVA RATHKA—A dark red flowering shrub coming into blossom just after the Spirea Van Houtte. It has little bell shaped flowers of dark red. Very showy and one of the best shrubs for planting any place you would want a shrub to be. Can be trimmed or cut back at any time and kept the size desired. Will continue to blossom throughout the entire summer.

18 to 24 in.	50c
2 to 3 ft.	60c
3 to 4 ft.	75c

WEIGELA VARIEGATED—Should be in every collection. Its variegated foliage, silver yellow and green leaves with pink flowers have won it much fame and popularity.

18 to 24 in.	50c
2 to 3 ft.	60c
3 to 4 ft.	75c

TAMARIX AMERUSE—These plants are very beautiful all the year, in winter for their coloring of the bark and in summer for the light green, feathery foliage and large loose panicles of flowers.

3 to 4 ft.	50c
4 to 5 ft.	60c

VIBURNUM (High Bush Cranberry)—Ornamental as well as useful; its white flowers are followed by clusters of red berries resembling cranberries, which remain on the bushes all winter.

18 to 24 in.	40c
2 to 3 ft.	50c
2 to 4 ft.	60c

VIBURNUM LANTANA—Upright shrub with large filmy white flowers in May followed by pink berries which later turn red, then black. Heart-shaped crinkly foliage, light green above and silvery beneath.

2 to 3 ft.	60c
3 to 4 ft.	75c

VIBURNUM DENTATUM—Bright green heart shaped leaves turning to purple and red. Flowers in May and June of creamy white.

.....	50c
.....	60c

Eva Rathka

By the proper selection from the varieties listed in this catalog, the home maker can have interesting specimens in their most perfect state, interesting to himself and the passerby at all times of the year.

CLIMBING VINES

Without climbing vines many homes would lack much of their beauty. Then it follows that many homes that are still dull and unattractive can be made beautiful from early spring, when the tendrils of hardy climbers take on new life, till winter comes again.

CLEMATIS JACKMANII—One of the best known of all the clematises. The velvety-purple flowers, when expanded, are four to six inches across, very velvety and distinctively veined.

2 yr. No. 175c

CLEMATIS, HENRYII—Large flowering white Clematis. A strong grower and free bloomer.

2 yr. No. 175c

CLEMATIS MAD. ANDRE—This is the nearest approach to a bright red Clematis. It is a very free bloomer and very satisfactory.

2 yr. No. 175c

CLEMATIS PANICULATA — This Clematis is by far the most popular of all the species. It is extremely showy when covered with the small white fragrant flowers, which appear late in the season. Beautiful, shiny, green foliage.

2 yr. No. 140c

3 yr. No. 150c

HONEYSUCKLE (Halls Japan)—Honeysuckles are well adapted for the covering of walls, arbors, etc., are very ornamental as the leaves remain on during the winter. The flowers are white, turning to yellow and are very fragrant.

2 yr. No. 140c

3 yr. No. 150c

WISTARIA (purple)—This is one of the best and commonest of hardy climbers. Drooping clusters of purplish, pea-shaped flowers.

2 yr. No. 150c

SCANDENS (Bittersweet)—Hardy ornamental vine. Very effective by their bright-colored fruit remaining usually throughout the winter. They grow in almost any soil and situation. Fruit is about one-half inch in diameter, orange-yellow, with crimson seed.

3 yr. No. 150c

DUTCHMAN'S PIPE—A very vigorous growing vine with large deep green leaves and green twigs, producing in abundance a purplish blossom much resembling a pipe. Grows very dense.

3 yr. No. 180c

IVY (Engleman's)—Like the Boston Ivy only that it has a larger leaf and stands out more from the wall. It makes a quicker growth. It will cling to brick and stone.

3 yr. No. 150c

IVY (Ampelopsis) (Boston Ivy)—Once established grows rapidly and will stay indefinitely, needing only an occasional trimming to keep it within bounds. It is not attacked by disease or insects and the foliage is not injured by the smoke and dirt of cities. The glossy leaves turn to a brilliant orange-scarlet in the fall.

2 yr. No. 150c

3 yr. No. 165c

EUONYMUS RADICANS—A hardy evergreen vine, or will form a spreading shrub where it can not climb. Valuable for covering graves, especially desirable for shady locations.

2 yr. No. 150c

3 yr. No. 160c

JAPAN SPURGE—For borders or shady places.

HEDGE PLANTS

A small amount of money invested in beautiful hedges will add more value to a country or city home property, dollar for dollar, than any other similar investment. A hedge planted about the borders of a lawn will transform a heretofore bare looking spot into a place of beauty, and you can keep it low or let it go high, as a screen. City lots may be divided by Hedging with fine effect.

BARBERRY, THUNBERGII—We consider this the best hedge plant in existence. It is beautiful throughout the year; its abundant crop of bright red berries makes it even more attractive in the winter than the summer. Its compact growth and thorny branches make a defense hedge that will turn cattle after five years' growth. As an untrimmed hedge it requires no attention except an occasional cutting of a few straggling branches. The natural growth is so dense and even that it forms a perfect hedge without shearings, but if a formal hedge is desired, it can be made so by shearing; hardy, of easy culture, and will grow in any soil or situation. For a hedge, plant in single row, 15 inches apart.

	Each	100
3 yr. 12-15in.	\$0.20	\$15.00
4 yr. 18-20 in.25	20.00
5 yr. 24-30 in.35	30.00
Barberry, Box, 5 yr. 15-18 in.40	35.00

PRIVET, AMOOR RIVER—Hardest of all hedge plants. Beautiful upright growth and makes a very compact beautiful hedge. Sheds its foliage a little earlier than California Privet.

	Each	100
3 yr. 12-18 in.	\$0.08	\$7.00
4 yr. 18-24 in.10	8.50

NEW RED LEAF BARBERRY—Similar in all respects to the green leaved Japanese Barberry which is so popular for mixing in a shrubbery border as single specimens or for planting in clumps on the lawn, as well as for foundation plantings and for hedge, but the foliage of this new variety is of a rich, lustrous bronzy red, similar to the richest brilliant and red leaved Japanese Maple. As the season advances it becomes more gorgeous and in the fall its foliage changes to vivid orange scarlet and red shades. To best develop its brilliant coloring, plant in full exposure to the sun.

Vivid Red Foliage from Early Spring until Late Fall

3 yr. No. 1	65c
3 yr. No. 2	50c

See Illustration on Back Cover Page

ROSES

Roses thrive best in a medium light clay soil. Before planting prepare the soil by spading and thoroughly working over to a depth of about 18 inches, fill in and work it carefully into the well-rotted stable manure while spading the soil. After the plants are set for best results cut all branches back to within 3 or 4 inches of the top of the ground. The new growth coming out will make a much nicer head than if the plant were not pruned, and the bushes will bloom all the better.

Rosa Rugosa, Rubra and White single, 55c each, \$5.00 per 10.

Rugosa Roses

RUGOSA, GROOTEN-DORT—Bud small, flower open, double, borne in clusters on average length stems; very lasting; slight fragrance. Color bright red, edges of petals serrated like a carnation; disease resistant. Vigorous grower of bushy habit, bearing a profusion of bloom from June to October. Very hardy.

RUGOSA, HANSA—Large double, reddish violet. Rampant growth.

RUGOSA, CONRED F. MEYER—Flowers large, double cup-shaped. Color deep, bright, vivid, intense pink, with the penetrating fragrance of the old June Roses.

RUGOSA, SIR THOS. LIPTON—The best pure white Rugosa Rose. Strong and vigorous; grows four feet high. Flowers perfectly double, pure snow-white. Fragrant. Blooms more than once during the season. Each 65c; Per 10, \$6.00.

CLIMBING ROSES

Price, 2 yr. No. 1 Each, 55c; Per 10, \$5.00.

CRIMSON RAMBLER—Will attain a height of 10 to 20 feet in a season; produces a marvelous profusion of rich and glowing crimson clusters during June and July. It is the supreme novelty among climbers and the forerunner of the splendid array of "Ramblers" now embraced in this class.

DOROTHY PERKINS—A most beautiful shell pink. The flowers are borne in large clusters of small double bloom and very sweet scented.

EXCELSA—A sensational new hardy climbing rose. Flowers are very double, produced in immense trusses of thirty to forty flowers to each truss. Color intense crimson—new and distinct. Lasts a lifetime.

LIST OF CLIMBING ROSES

American Beauty, Pauls Scarlet, Dr. Van Fleet, American Pillar, Gold Finch, Gardenia, Silver Moon, Flower of Fairfield. 2 yr. No. 1, Each 65c; Per 10, \$6.00.

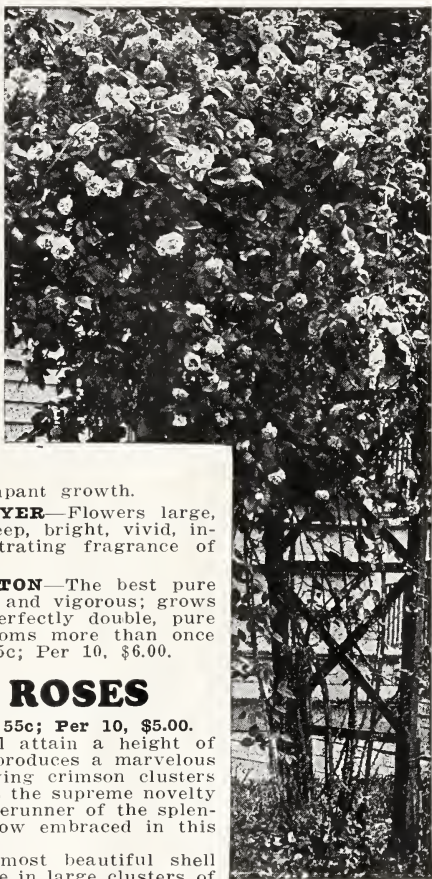

LIST OF HYBRID PERPETUAL AND TEA ROSES

HARDY EVERGREENS

The Evergreen has vouchsafed man in order to give him to understand more fully the Eternal promise of life everlasting. Evergreens typify permanency, defy time and the elements. In the bleak Northern winters the Evergreen stands out in the landscape, fresh green, and full of cheer. An Evergreen must not have its roots exposed to the sun or wind not even a minute. For this reason large sized trees are dug with a ball of dirt left with the roots and a bur-lap cloth sewed tightly about it. On smaller sizes of trees we are able to mud the roots heavily and cover with wet moss and cloth.

NORWAY SPRUCE—The best all-around evergreen. The ideal tree for wind breaks. Its close compact growth forms an almost impenetrable barrier to the frigid storms of winter. Norway Spruce deserves to be largely planted on all farms around orchards, barn and cattleyards, poultry-houses and grounds, and wherever protection from cold and storms is needed. At the same time, Norway Spruce is one of our choicest evergreens for ornamental planting.

Spruce

1½ to 2 ft.	\$1.00
2 to 3 ft.	1.50
3 to 4 ft.	2.50
4 to 5 ft.	3.75
5 to 6 ft.	4.75

AMERICAN ARBOR VITAE—Very suitable for hedge planting, as it can be kept at any height by shearing. Also widely used in ornamental planting, as they become wonderfully beautiful, if allowed to grow tall.

1½ to 2 ft.	\$1.50
2 to 3 ft.	1.75
3 to 4 ft.	3.00
4 to 5 ft.	4.00
5 to 6 ft.	5.25

FYRAMIDAL ARBOR VITAE—Excellent for group planting in corners of the lawn. Grow naturally close and compact. Very branchy and feathery. Holds its bright green color all the year.

1½ to 2 ft.	\$1.75
2 to 2½ ft.	2.75
2½ to 3 ft.	3.75
3 to 4 ft.	4.75
4 to 5 ft.	7.50
5 to 6 ft.	10.00

Plant Evergreens for all year round beauty. Use them for foundation plantings, windbreaks, or in the open as specimen ornamentals.

EVERGREENS—Continued

COMPACTA ARBOR VITAE —

Similar in habit to the Globe but of faster growth. Foliage rich green. Very good for foundation planting, grouping and hedging.

10 to 12 in.	\$1.25
12 to 15 in.	2.00
15 to 18 in.	3.00
18 to 24 in.	4.75

*GLOBOSA ARBOR VITAE —

Grows in a round, compact form without shearing. One of our most attractive dwarf trees, and a valuable acquisition to any lawn. Foliage rich green turning gold bronze in winter.

10 to 12 in.	\$1.25
12 to 15 in.	2.00
15 to 18 in.	3.00
18 to 24 in.	4.75

An Attractive Evergreen Planting

GOLDEN ARBOR VITAE—Foliage bright yellowish green all through the winter changing to golden yellow in spring.

12 to 15 in.	\$1.25
15 to 18 in.	2.00
18 to 24 in.	2.75
2 to 2½ ft.	3.75

Retinospora Plumosa Aurea

***TOM THUMB ARBOR VITAE**—A dwarf compact growing variety, with finely cut foliage. Suitable where a low specimen is wanted; also useful for hedging and foundation planting.

8 to 10 in.	\$1.25
10 to 12 in.	1.50
12 to 15 in.	1.75
15 to 18 in.	2.75

CHINESE ARBOR VITAE

—A pyramidal tree finally attaining a height of 25 feet, very compact form. Foliage is bright green.

18 to 24 in.	\$1.75
2 to 3 ft.	2.75
3 to 4 ft.	3.75
4 to 5 ft.	5.75

SIBERIAN ARBOR VITAE

—One of the best of the genus of this country; exceedingly hardy, keeping color well; growth compact and pyramidal.

12 to 15 in.	\$1.25
15 to 18 in.	2.00
18 to 24 in.	3.00
2 to 2½ ft.	4.25

EVERGREENS—Continued

Austrian Pine

2 to 3 ft.	\$1.50
3 to 4 ft.	2.75
4 to 5 ft.	3.75

PONDEROSA PINE—A lofty tree from our western coast; hardy quick growing, with long needles of silvery green.

2 to 3 in.	\$2.75
3 to 4 ft.	4.25
4 to 5 ft.	5.75

***JUNIPER, SABINA**—A low, wide spreading, thickly branched evergreen shrub rarely 5 ft. high. Very attractive with semi-erect branches well clothed with deep green foliage. An excellent tree for rock work or dwarf plantings.

12 to 18 in.	\$2.75
18 to 24 in.	3.25
2 to 2½ ft.	4.75
2½ to 3 ft.	5.75
3 to 4 ft.	7.50

***JUNIPER PFITZERS**—One of the newer additions to the hardy Evergreen family, but rapidly coming into front rank for ornamental planting. Grows in the form of a low, broad pyramid. Foliage rich tea green.

Price, same as Sabina.

JUNIPER, GLAUCA—A very vigorous variety with silvery blue foliage. This is one of the most beautiful forms of the red cedar, and makes a splendid specimen tree.

1½ to 2 ft.	\$2.25
2 to 2½ ft.	3.75
2½ to 3 ft.	4.75
3 to 4 ft.	6.50
4 to 5 ft.	7.75

***MUGHO PINE**—A dwarf evergreen of great beauty. Rarely grows over 10 feet tall with a spread of branches as great as its height. Especially useful for border planting or for grouping with other varieties or single specimens on the lawn. Foliage is medium dark green, thick set, and rather long.

8 to 10 in.	\$1.50
10 to 12 in.	1.75
12 to 15 in.	2.25
15 to 18 in.	3.25
18 to 24 in.	4.75
2 to 2½ in.	6.75

AUSTRALIAN PINE—A tall tree, with a broad, ovate crown; leaves in pairs, about four inches long, rigid and very dark green; cones two or three inches long of a glossy yellowish-brown color. A fast growing, dense tree of great adaptability.

2 to 3 ft.	\$1.50
3 to 4 ft.	2.75
4 to 5 ft.	4.25

WHITE PINE—Lends itself to every purpose and is one of the most beautiful native evergreens. Foliage long and graceful, of a light green color. Fine for lawn specimens or group planting.

Arborvitae

EVERGREENS—(Continued)

JUNIPER, IRISH — A slender, columnar form with numerous upright branches; invaluable in Italian gardens where its architectural features are desirable, foliage glaucous green.

1½ to 2 ft.	\$1.50
2 to 2½ ft.	2.50
2½ to 3 ft.	3.25
3 to 4 ft.	4.75
4 to 5 ft.	6.75

JUNIPER DEPRESSA — A new variety of spreading Juniper which has become quite popular with those who have become acquainted with it. It is a compact and well balanced plant, of rich bronzy-green color. Probably best used as a foundation plant or in the border where a low planting is required.

18 to 24 in.	\$2.75
2 to 3 ft.	3.75
3 to 4 ft.	5.75

***JUNIPER WAUKEGAN** — A creeping Juniper growing close to the ground, with long trailing branches of a soft blue color in spring and summer, changing to a rich purple in late fall.

12 to 18 in.	\$2.75
18 to 24 in.	3.75
2 to 2½ ft.	5.75

***JUNIPER TAMARISCIFOLIA** — A distinct trailing variety of Sabina with very agreeable bright symmetrical and dense in habit Chinese Junipers.

Black Hill Spruce

blue green foliage. Is perhaps more of growth than other procumbent

12 to 18 in.	\$2.75
18 to 24 in.	3.75
2 to 2½ ft.	5.75

***JUNIPER HORIZONTALIS** — Hardy vigorous grower, main stem lying close to the ground and lateral branches growing upward. Rich in green color. Very hardy. For planting on terraces, banks and other places where a low beautiful evergreen is wanted.

18 to 24 in.	\$2.75
2 to 2½ ft.	3.75
2½ to 3 ft.	5.75

JUNIPER VIRGINIA — This beautiful evergreen attains a height of 100 feet, with conical head and spreading upright branches. Leaves are spiny pointed.

2 to 2½ ft.	\$2.75
2½ to 3 ft.	3.25
3 to 4 ft.	4.75
4 to 5 ft.	5.75
5 to 6 ft.	7.50

SPRUCE (Black Hill) — Dark green perfectly hardy, very compact, the best for general planting.

12 to 18 in.	\$2.00
1½ to 2 ft.	3.50
2 to 3 ft.	4.75
3 to 4 ft.	6.50

SPRUCE (White) — A very ornamental tree similar to the Norway Spruce. One of the best for cold climates. Is an upright, compact grower, and retains its branches to

Viola (Tufted Pansy) yellow, 4 in., May-July18	1.50

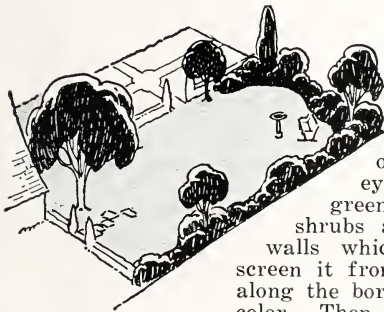

The Front Yard Should be Open and Inviting

In America it is the custom to leave the front yard open to the public. It is in good taste to make this portion of your grounds so attractive that it makes a pleasing impression on the passer-by.

For the utmost in attractiveness in the front yard, plan to have an open stretch of well kept lawn framed on either side by plantings of evergreens and shrubs placed in pleasing arrangement in beds and borders along the lot lines. Plant hardy flowers in front of shrubbery borders and in bays to add color and interest. Plant trees for shade and to frame the view of your house.

Every Home should have an Outdoor Living Room

In place of an open rear yard within the view of everyone you should plan a private outdoor living room. Here you can enjoy the sunshine, and work among your shrubbery and gay flowers out of the sight of prying eyes. Let the turf provide a green carpet; plant beautiful trees, shrubs and evergreens to make the walls which set the room apart and screen it from view. Plant hardy flowers along the borders to provide fragrance and color. Then locate a few trees to provide comfortable shade and fruit. Altogether you will have a room as delightful as anyone could dream, a room which will give you countless hours of enjoyment and satisfaction.

This illustrates an outdoor living room with its green carpet for the kiddies' feet, its sweet flowering blooms so refreshing to all and its friendly trees which throw a kindly shade.

New Red Leaf Barberry, for description and prices see page 26.

New and Valuable Acquisitions

JAPAN BLOOD LEAF MAPLE—Rounded, dwarf trees seldom maturing to over ten feet, densely furnished to the ground with indented leaves of unrivaled brilliancy and charm. Their early and mid-summer aspect is vivid blood-red, which dulls to a bronzy purple-red towards fall. These are splendid foreground subjects in mixed groups or for solitary color blotches in the open lawn. Supply limited.

12 to 15 in. \$3.50; 15 to 20 in. \$5.00.

LODENSE PRIVET—Another outstanding New development in Privets, which converts the beautiful foliage and twig formation of Ovalifolium, into a slow growing densely compact dwarf bush which can be used without shearing, for very low hedges and borders. It can be planted close and kept clipped down like Boxwood, (which it resembles) but is even more attractive and useful spaced for individual rounded clumps. 8 to 10 in., 10 for \$2.50; 100 for \$20.00; 12 to 15 in., 10 for \$3.00; 100 for \$25.00.

Persian Lilac, for description and prices see page 21.
